Solar Ready Challenge II Project

SWFRPC is one of the nine regional councils working with National Association of Regional Councils on the U.S. Department of Energy's Rooftop Solar Challenge II award. This project is intended to promote solar best management practices and implement more streamlined and standardized solar installation processes. This project is anticipated to result in a reduction of solar market barriers, fewer soft costs and a more streamlined and standardized process for solar energy implementation options. SWFRPC staff will report activities underway to develop enhanced engagement and implementation of best management practices, training curricula for solar infrastructure installation, and strategies for improved permitting and adoption.

U.S DEPARTMENT OF ENERGY SUNSHOT INITIATIVE

ROOFTOP SOLAR CHALLENGE

U.S. DEPARTMENT
OF ENERGY

SUNSHOT INITIATIVE

The U.S. Department of Energy **SunShot Initiative** is a collaborative national effort that aggressively drives innovation to make solar energy fully cost-competitive with traditional energy sources before the end of the decade. Through SunShot, DOE supports efforts by private companies, academia, and national laboratories to drive down the cost of solar electricity to \$0.06 per kilowatt-hour.

U.S. DEPARTMENT
OF ENERGY

SUNSHOT INITIATIVE

ROOFTOP SOLAR CHALLENGE

The U.S. Department of Energy SunShot Initiative **Rooftop Solar Challenge** incentivizes regional awardee teams to make it easier and more affordable for Americans to go solar. By streamlining permit processes, updating planning and zoning codes, improving standards for connecting solar power to the electric grid, and increasing access to financing, teams will clear a path for rapid expansion of solar energy and serve as models for other communities across the nation.

SOLAR READY II

Partnering with **Mid-America Regional Council (MARC)**, **National Association of Regional Councils (NARC)**, **Meister Consultants Group (MCG)**, and **Council of State Governments (CSG)**.

partners

Goals are to implement solar best management practices, training materials and methods, and other proven implementation strategies previously established by MARC's 2012 Solar Ready KC Initiative.

goals

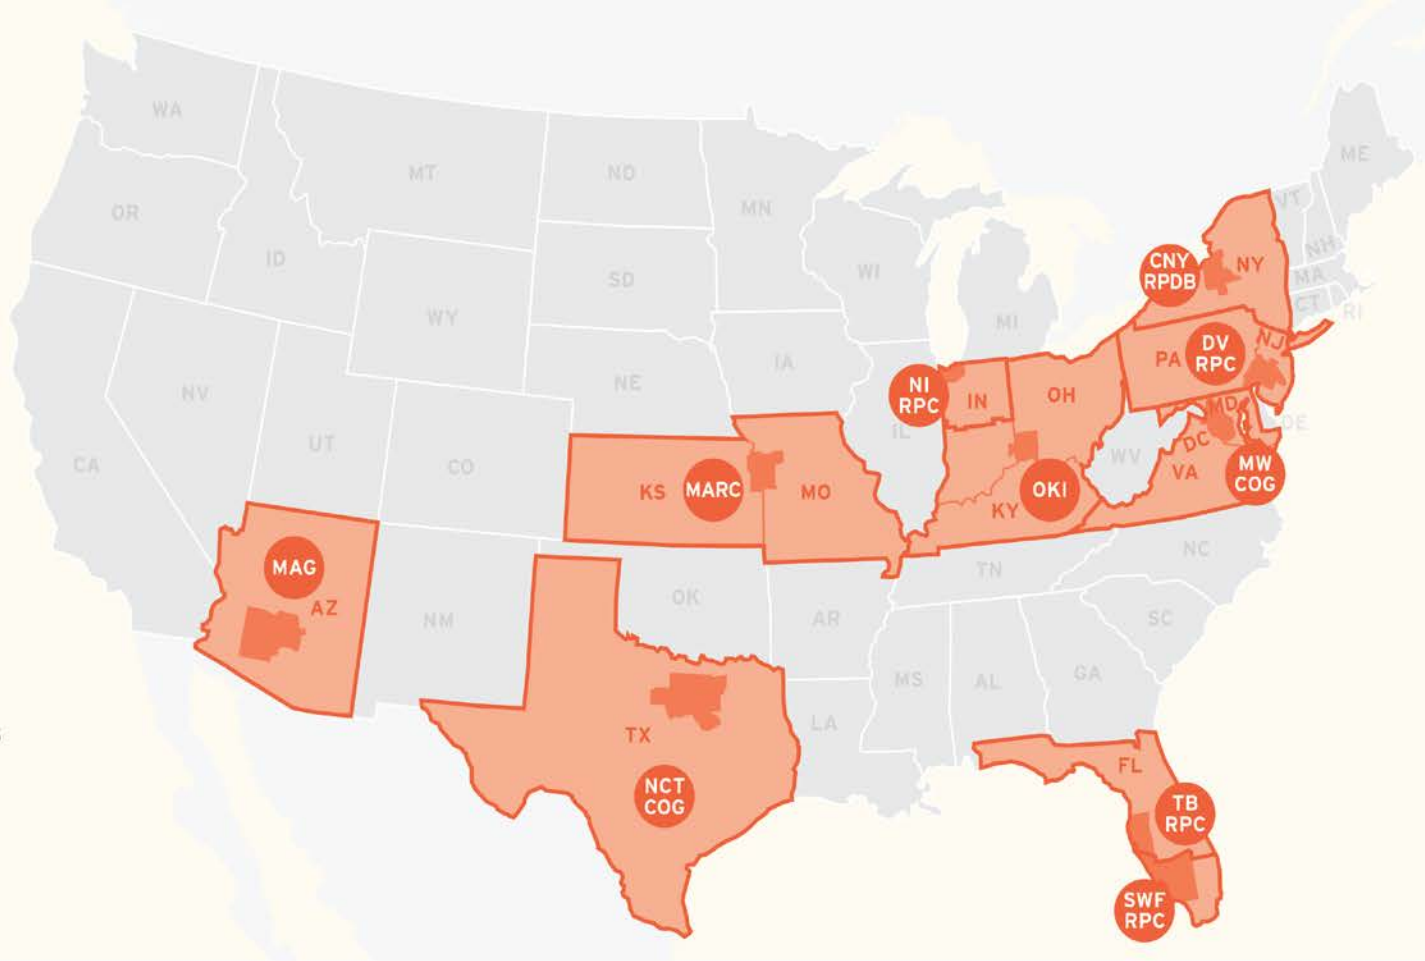

Ultimately will result in more streamlined and standardized solar practices, and will achieve measurable improvements in solar market conditions and access for ten million people across the US.
